

WORKING
COLLABORATIVELY

TO IMPROVE OPERATIONAL EFFICIENCIES

COSMOS' MISSION

To apply our Lean & Process Improvement expertise to work in your business to provide positive benefits, value and a great return on your investment in our services.

RCP and Cosmos Performance have teamed up for several years to support businesses in improving their operational efficiencies and cost-down exercises.

We look at a range of efficiency improvement areas including bid support, operations reviews, mobilisation support, cost out and transformation and lean/process improvement training.

The list of businesses that Cosmos have supported over the years is as extensive as it is impressive; from the huge healthcare complexities of the NHS to the various facilities of the BBC and Virgin Media.

HOW DOES THE COLLABORATION BENEFIT BUSINESSES

RCP and Cosmos fit together well because the DNA of the businesses are attempting to achieve the same thing:

- ✓ Reduced Costs
- ✓ Improved Efficiencies & User Safety
- ✓ Long-Term Partners
- ✓ Environmental Sustainability

COSMOS HAS RECOMMENDED AND IMPLEMENTED RCP WITH MANY BUSINESSES DUE TO THE EFFICIENCIES THAT CAN BE ACHIEVED AND THE BENEFITS BELOW

- Are highly durable, meaning that long-term sustainability is better, and once they're purchased, budgets will not need to be repeated and can be diverted elsewhere
- Reduce the amount of water and energy used throughout the facility
- Provide cost savings in their usage vs. cheaper, lower quality, less durable alternatives
- Are innovative, user-friendly and support the hygiene of the facility's users
- Act as a mobile workstation, providing a high amount of space for replenishments reducing trips to and from the store cupboard while providing improved operational productivity

WE HAVE EXPERTISE IN THE FOLLOWING SECTORS:

HEALTHCARE

RETAIL

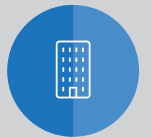

MANUFACTURING

CONSTRUCTION

HOSPITALITY

OFFICES

FACILITY
MANAGEMENT

AVIATION
& TRAVEL
